The Forces Collection: Torrential Rain.

Thunderstorms are nature's own symphony. The sound of thunder rumbles across jagged landscapes and torrential rain pelts down in an even rhythm, cutting and chiseling architectural shapes out of stone and rock.

Product Information

Rain is one of nature's greatest and most inspiring forces, and the sight of heavy raindrops splattering across a windowpane, running down the glass in watery rivulets, is mesmerizing. The patterns that they make, and the trails they leave behind are the inspiration that runs through our Belgotex

new Torrential Rain range of heavy commercial carpet tiles. Torrential Rain's repetitive patterns in the high-low pile gives a textured look and creates a beautiful rain-inspired setting in any heavy commercial environment.
